PROFILE

Hello! My name is Mark Nou and I am a developer with a passion for art and graphic design. Prior to my career in development, I worked in operation management in the logistics industry. While I enjoyed my work, I felt a deep desire to pursue my creative side and use my problem-solving skills in a more hands-on way. This led me to make the switch to development, where I have found a perfect balance between creativity and analytical thinking. I love being able to bring my ideas to life through code and design, and I am constantly seeking new challenges and opportunities to grow.

WORK EXPERIENCE

Software Developer

ShipCalm 3PL

May-2023 - Current

- Proficiently integrated backend systems to automate 3PL shipping rates by leveraging InfoPlus, EasyPost, Tray.io, and JavaScript technologies, resulting in streamlined and efficient shipping processes.
- Developed and integrated a cutting-edge Shopify app that enabled customers to have real-time visibility and control over inventory, enhancing their overall shopping experience and increasing sales potential.
- Utilized strong skills in InfoPlus, EasyPost, Shopify, Java, Tray.io, and JavaScript to drive seamless integration of various systems, ensuring smooth data flow and optimizing business operations.
- Demonstrated expertise in working with Application Programming Interfaces (APIs) and Third-Party Logistics (3PL), effectively bridging the gap between different platforms and enabling efficient data exchange for enhanced functionality and productivity.

Fullstack Developer

LEARN Academy

March 2023-- Current

- Full-stack Developer specializing in JavaScript, CSS, HTML, React, and Ruby on Rails.
- Collaborated with other developers, designers, and stakeholders to deliver projects within scope, budget, and timelines.
- Provided technical guidance and support on best practices, coding standards, and software architecture.
- Conducted code reviews, testing, and debugging to ensure high-quality code and optimal performance of web applications.

General Manager

Sunshine Logistics

October-2018 - January 2023

- Successfully negotiated and managed multiple contracts with partners, Global Logistics Systems and Ontrac, resulting in increased revenue and expanded market reach.
- Oversaw financial management, including reviewing and processing inbound/outbound invoices, tracking profit and loss, and reporting on company performance, resulting in more informed decision-making and improved profitability.
- Developed and implemented budgeting and operational plans to increase efficiency and mitigate losses, resulting in significant cost savings and improved operations.
- Led a team of 40 employees, including hiring, onboarding, and performance review processes, while directing inbound/outbound transportation operations, warehouse activities, safety performance, and logistics quality management, resulting in a highly efficient and effective team.
